FCC Chairman Kevin Martin

Dear FCC Chairman Martin,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Phil Verges
